

KRAMER XT

Mulinello Low Profile costruito in alluminio e corpo in compound ultraleggero, circa 200 grammi. Fornito di freno magnetico a 10 regolazioni che permette una regolazione perfetta del lancio. La velocità di recupero è di 6,3:1, quindi indicato per il Power Fishing con spinnerbaits e jerks. La morbidezza del recupero è garantita da 10 cuscinetti di cui 7 in acciaio inox, 2 cuscinetti in acciaio blindati ed 1 cuscinetto di anti-ritorno. La potenza del recupero viene esaltata dal pignone e dall'alberino entrambi in bronzo e dalla frizione a dischi maggiorati. Grazie alla sua potenza ed ai cuscinetti blindati, questo modello è anche raccomandato per la pesca con l'Inchiku e Kabura in mare.

Low Profile reel, built in aluminium and ultra-light compound, in facts the total weight is just 200 grams. Featuring a magnetic brake with 10 steps adjustment, for a perfect and precise cast setting, even in case of front wind. The ratio is 6,3:1 so recommended for Power Fishing with spinnerbaits and jerks. The smooth retrieve is ensured by the 10 ball bearings, of which 7 are in stainless steel, 2 are in stainless steel sealed and 1 is for the one-way clutch. The line winding is regular and homogeneous and it is ensured by the worm-shaft system. The retrieve power is highlighted by the pinion and drive gear in pure bronze and by the clutch empowered by over-sized washers. The spool capacity is 180 yds of 10 lbs. With its power and its sealed ball bearings, this reel is highly recommended also for the Inchiku and kabura sea fishing.

KASTER

Il peso è appena 220 grammi, recupero molto fluido garantito dai 6 cuscinetti in acciaio più un cuscinetto per l'anti-ritorno. La frizione è dotata di dischi in Dartanio e permette di affrontare anche importanti combattimenti, e la regolazione del freno magnetico è facilitata dalla guancetta laterale con sgancio a pulsante.

The weight is very light, just 220 grams, and it features a very smooth retrieve ensured by 6 stainless steel ball bearings plus an extra one for the one-way clutch system. The spool is made of aluminium and lightened by holes. The clutch features Dartanium washers and allows to perform heavy and long lasting fights. The adjust of the magnetic brake is easy and quick, by the sliding side plate that opens just pressing the button.

DRAKE

Proposto in ben quattro misure, necessarie a soddisfare qualsiasi esigenza specifica, è l'ideale per la pesca a spinning. Fantastico bilanciamento, frizione a regolazione micro metrica. Molto indicato anche per tutte le discipline light, in acque salate.

Proposed in no fewer than four measurements to satisfy all individual requirements, it is perfect for fishing with spinning rods. The most surprising thing about this article is its amazing balance, its capacity to coil the nylon perfectly, the micrometrically-regulated drag and its overall reliability. It is also highly recommended for all light disciplines in salt water.
