SPEED FRY MN121

Floating - Length 60mm - 6,5gr - Diving 0-1,2mt

Piccolo minnow per la pesca in corrente a trote o in laghetto. Molto stabile e con movimento rolling abbastanza pronunciato, anche a recupero lento. Artificiale molto manovrabile che ha dato eccellenti risultati anche su grossi cavedani e anche in mare nella pesca alla spigola nel porto.

Small minnow for fishing trouts in streams or small lakes and ponds. Very stable and featuring a rolling action quite evident, even using a slow retrieve. A very handy lure that has proven to be a good catcher also fishing big chubs and also for seabass inside sea piers and harbours.

Code: ARKISHI09B

Code: ARKISHI09A

Code: ARKISHI09C

Code: ARKISHI09D

Code: ARKISHI09E

CURBER TW25

Floating - Length 78mm - 8,5gr - Diving 0-0,8mt

Il Curber TW è un minnow galleggiante con un profilo molto particolare, disegnato con la pancia piatta ed il corpo incurvato nella parte superiore. Queste caratteristiche permettono al Curber TW di affondare in modo deciso per essere subito in pesca nello spot. L'azione è di un wobbling stretto e veloce. Ideale per la pesca alla trota in torrente.

The Curber TW is a floating minnow featuring a special and particular body shape, designed with a flat belly and curved top body. This kind of design allows the Curber TW to sink rapidly, in order to be at work immediately into the spot. The swimming action is a fast and narrow wobbling. Recommended for trouts.

ST89 MINNOW

Floating - Length 80mm - 10,0gr - Diving 0-1mt

Piccolo minnow dalla forma classica, con testa arrotondata per aumentare la rapidità di affondamento. La paletta imprime a questo minnow un movimento di rolling molto veloce, con larghe sbandate o rapidi guizzi impressi dalla velocità e modo di recupero. Ottimo nel jerking sottoriva o sugli erbai. Un'esca usabile in moltissime situazioni e con praticamente ogni tipo di predatore.

Small minnow with a classic shape, featuring a rounded head that helps the lure to sink rapidly. The tip design gives to this minnow a very fast rolling action, with wide spins and fast runs, ruled by the rod and retrieve action. It is a perfect lure for jerking nearby the bank or over grass bottoms. It is a lure effective in many situations and aimed practically to all kind of predators.

Code: ARKISHI07D

Code: ARKISHI07E

MAGNET SB122D

Top Water - Length 100mm - 20,0gr

Una vera swimbait in soli 10cm! Un'esca eccezionale, definita magnificamente in ogni particolare, come le pinne in materiale rigido che danno stabilità nel movimento e simulano perfettamente un vero pesce foraggio. Il Magnet è un artificiale da recuperare con la classica azione da swimbait, con stop-and-go o con recupero costante. Il peso consente lanci a lunga distanza, per l'esplorazione di erbai sommersi e senza avvicinarsi troppo allo spot.

A true swimbait in just 10cm! It is an extraordinary lure, perfectly defined in every detail, like the belly fins made in tough material and that give stability to the swim and also simulate a true bait fish. The Magnet is a lure to work with the classic movements of a swimbait, with stop-and-go or constant retrieve. The weight allows long casts, to explore grass bottoms without get too close to the spot and scare the fishes.

SPAWN 90 C

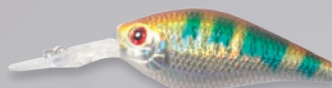

Floating - Length 55mm - 9,0gr - Diving 0-1,2mt

Lo Spawn 90C è un crank in miniatura, con un corpo a goccia ed una paletta di discreta lunghezza, che permette un affondamento rapido per l'esplorazione delle buche e nei giri d'acqua. L'azione è un wobbling lento ed abbastanza ampio, che aumenta accelerando il recupero. Indicato per trote, persici reali e tutti i predatori di media taglia.

The Spawn 90C is a tiny crankbait, featuring a short drop body shape and a quite long lip, that allows a fast sink, ideal to explore the deep holes and flow corners. The swimming action is a slow wobbling and quite wide, that increases speeding up the retrieve. It is recommended for trouts, perchs and all medium sized predators.

Code: ARKISHI08E

Code: ARKISHI08C

Code: ARKISHI08D

GRINCH 154

Floating - Length 55mm - 13,5gr - Diving 0-1,50mt

Il Grinch 154 è un crankbait dal profilo inusuale, per il medium deep, le cui maggiori peculiarità sono le aperture poste sotto gli occhi che producono moltissime bollicine ed anche lo spoiler posto sotto la pancia che aiuta a produrre turbolenza e bolle d'aria. L'azione in acqua è un wobbling e rolling lento. E' stato creato per essere un killer nella pesca al black bass.

The Grinch is an unusual crank, and its main feature is about the openings below the eyes that produce a lot of bubbles and also the hydrodynamic spoiler positioned under the belly, that helps as well to produce bubbles. The swimming action is a slow wobbling and rolling. Made as a killer lure for black bass fishing.

SQUAT SAMMY T33

Floating - Length 68mm - 20,0gr - Diving 0-3mt

Un crank molto particolare, che esprime un nuoto diverso da qualsiasi altro. La forma del corpo si allarga sulla base, fornendo una stabilità incredibile nel nuoto. La paletta è dotata di alette laterali che consentono delle rapide sbandate con un rapido movimento laterale della punta della canna. Eccezionale nella pesca di ricerca su fondali importanti, anche in presenza di ostacoli, in quanto il profilo della paletta protegge in modo perfetto le ancorine evitando l'incagliamento.

A very particular crankbait, that express a swimming action different from any other lure. The body design gets larger and flat on the lower part, giving an incredible stability to the swim. The lip is provided of side wings that allows to make fast side spins just moving the rod tip. Extraordinary when used as a research lure on deep waters, even in presence of structures, as the special lip design protects perfectly the treble hooks to get stuck.

Code: ARKISHI03A

Code: ARKISHI03B

Code: ARKISHI03E

Code: ARKISHI03C

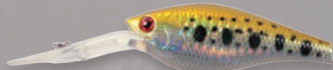

Code: ARKISHI03D

DOWNUDER 90A

Floating - Length 80mm - 23,0gr - Diving 0-4mt

Eccezionale crank per la pesca di ricerca in profondità. Raggiunge rapidamente i quattro metri di profondità e sviluppa una bellissima azione di rolling e wobbling. Dotato di rattlers di grosse dimensioni che emettono suoni a bassa frequenza e di un balancer a scorrimento interno che stabilizza l'esca durante la fase di volo e limita al massimo lo sbandamento e quindi l'imprecisione del lancio. Il peso consente lanci a lunghissima distanza.

Extraordinary crankbait for the deep fishing. It reaches rapidly the 4 meters of depth and express an amazing rolling and wobbling action. Provided of big size rattlers that give low frequency sounds and of an internal sliding balancer that stabilize the lure during the fly to the spot and reduces the spin and so allows to be very precise on the spot. The weight allows very long casts.

Code: ARKISHI04B

Code: ARKISHI04C

Code: ARKISHI04D

Code: ARKISHI04E

THERIOS LL56

Sinking - Length 72mm - 20,0gr

Lipless dalla forma molto regolare, dotato di rattlers medi per l'emissione di suoni ad alta frequenza. Artificiale principe nella pesca su grandi fondali rocciosi, dove permette l'esplorazione di spot altrimenti inaccessibili. Il profilo stretto del corpo fornisce un movimento di lente sbandate. Bellissimi i colori e la definizione dei dettagli.

Lipless lure with a regular design, provided of medium sized rattlers that supply high frequency sounds. The must-have lure for the fishing on very deep rocky spots, in which it allows the search in points that would be impossible to reach using a traditional lure. The narrow body design supplies a slow swim with side spins. Very nice color range and high body details.

SKID ROW TW93B

Top Water - Length 80mm - 80,0gr

Popper molto efficace, specialmente nei periodi estivi e in tarda primavera. Questo tipo di esca è in assoluto quella che dà più emozioni, in quanto gli attacchi sui popper sono sempre molto violenti ed indimenticabili. Lo Skid Row ha delle piccole aperture sulla bocca che creano molte bolle e turbolenza, ed è abbastanza facile da manovrare a walking-the-dog.

An effective popper, especially during the summer times or in late spring. This kind of lure is without any doubt the one that gives the biggest emotions, as the attacks on poppers are always violent and unforgettable. The Skid Row has two small openings on the mouth sides, that create a lot of bubbles and turbulences, and it is quite easy to manoeuvre on walking-the-dog style.

KUDA KILLER TW70

Top Water - Length 100mm - 20,0gr

Popper di discrete dimensioni ideale per la pesca di superficie a pesci serra, lecce e anche spigole. Il suo peso consente dei lanci molto lunghi e il corpo aiuta nel controllo durante il recupero. Un'esca che ha dato risultati anche nella pesca al luccio, con attacchi violenti dal sottoriva. L'ampia apertura della bocca crea bolle e turbolenze molto intense e quindi richiama i predatori anche a distanza.

Well sized popper, recommended for the surface spinning to small amberjacks, shades and seabass. Its weight allows to very long casts and the body design helps the angler during the retrieve. A lure that has proven to be effective also for the pike fishing, for which we have experienced violent strikes nearby the bank waters. The big and large mouth creates intense bubbles and turbulences and so attracting the predators from far away.

L'idroflat è un progetto sviluppato da Colmic che ha impegnato per quasi due anni i progettisti e field-testers in continue prove e modifiche, fino ad arrivare a quello che riteniamo uno dei migliori crankbaits mai prodotti. Ogni particolare è stato sviluppato per fornire al progetto nell'insieme, una coerenza globale tra design, tecnica, precisione di lancio ed efficacia nella pesca. Perché l'Idroflat è veramente un artificiale che cattura. E' stato dotato di un sistema del balancer con magneti, che sia in fase di lancio che di recupero si sposta nella migliore posizione possibile per la giusta performance delle due fasi. Il rattler, che funge anche da bilanciatore, ha un movimento molto scarso e quindi produce un suono molto latente a bassa frequenza, praticamente è un crank semi-silenziato. Il design della paletta è stato sviluppato per fornire stabilità sia in fase di lancio che di recupero. La serie Idroflat è disponibile in tre versioni, con affondamento da max 1 mt, mt e 3,5 mt.

Idroflat is a project developed by Colmic, that has involved for almost two years the engineers and field-testers in many tests and amendments, until we have reached to what we think is one of the best crankbaits ever made so far. Every detail has been developed and applied to supply to the overall concept a global meaninh of design, technical innovation, casting accuracy and fishing effectiveness. Because the Idroflat really catches more fishes. It has been provided of a balancer system with a magnet, that moves in the best position both during the cast and during the fishing, in order to provide always the best performance in both phases. The single rattler, that has also a function of balancer, has a very small movement space and so produces a very low frequency sound, practically it is a semi-silenced crankbait. The lip design has been developed to supply stability both during the cast and the retrieve. The Idroflat series is available in three versions, with max depth capacity of 1,00 mt, 2,00 mt and 3,50 mt.
